

MICKFIELD HOSTAS

Dear Subscriber

Whoever said that winter is a slow time of the year?

We have been exceptionally busy preparing for the forthcoming season and carrying out essential maintenance round the nursery. We have relocated a selection of every variety we have for sale in a single poly-tunnel, which now looks highly organised. We will be finishing the work by concreting the pathways and designing new plant labels, and signs, ready for when we open on 1st April.

2016 Plant List

Our [2016 Availability List](#) is now online.

This coming season we are excited to be able to offer over 30 new, and reintroduced, varieties, including:

[H. 'Ruffed Up'](#), [H. 'Lucky Mouse'](#), [H. 'Great Escape'](#), [H. 'Sumsational'](#), [H. 'Kiwi Spearmint'](#) and [H. 'Colored Hulk'](#).

We also have good supplies of some of the most popular older cultivars, which continue to delight gardeners for the way they just get better and better as they mature.

We are noticing quite a few shoots starting to emerge earlier than usual. This is a tricky time of year when alternating weather patterns can do quite a lot of damage to first growth. As ever, we will need to work with the weather rather than trying to resist it, and do our best to mitigate any damage. Early leaves can be removed to encourage a second flush, once the risk of cold nights diminish.

Next month we will bring you the first movie from the nursery showing the latest developments...

As spring seems to be on its way...

we have created a mini movie of a couple of useful tips Mel uses in her garden to prevent snail damage.

2016 Price Freeze

We have decided to freeze plant and postage prices for 2016, so why not consider ordering some plants for your garden this year?

Click on the bag to find out how...
